Subject: Please choose option G

Dear Administrator Gina McCarthy,

I've been following this process for the past year, just a drop in the bucket when you consider this has taken 16 years. But based on everything I've seen and learned, the current cleanup plan is not good enough. Please choose option G, stop caving to businesses that don't want to clean up their mess, and take a stand for the people and wildlife who live here. We're the real victims and deserve a real cleanup plan.

Please significantly revise the plan in the following ways:

1. EPA should select Alternative G with additional dredging in areas of high human use, areas of high ecological value, and areas where there is high risk of recontamination of the river.
2. EPA should set much clearer timelines and metrics for success including setting an explicit date by which Portland Harbor specific fish consumption advisories will be lifted.
3. EPA should select an alternative that allows all members of our community to eat fish safely from our river, including woman of childbearing age and children.
4. EPA's cleanup plan should include the heavily contaminated uplands as well as the heavily contaminated river.
5. EPA should do a much better job of addressing environmental justice issues, including reviewing and correcting significant deficiencies in its public engagement strategies for future phases of the Superfund process and delineating strategies for ensuring the jobs, economic benefits and other benefits associated with the Superfund process to the local community and particularly to underserved communities that have been impacted by contamination in Portland Harbor.
6. EPA should eliminate the confined disposal facility which would create a permanent toxic waste dump in our river.

Thank you.

Sincerely,

(b) (6)

Portland, OR 97209
